

I love listening to K-Love. Their music is so inspiring and it often speak to the exact situation I'm going through. I'm very blessed by all they do.

I think the local community would be directly effected if the services of K-Love were changed in any way. I've listed to countless stories of how K-Love has made a positive impact on so many lives. I think making any changes would do more harm than good.

I think these services are a public interest because of the fact that K-Love is reaching so many people and the message that they share is really unlike any other staition on the air. The message that they share and the services that they provide is exactly what the community/public needs.

Please keep K-Love on the air, without any changes.
